

Ex-Centris, André Riopel Architect

Directional low voltage recessed downlight provides direct light.

Die cast aluminum optical assembly painted steel frame and housing.

Supplied with new construction plaster frame and integral electronic transformers.

Uses MR-16 lamps.

# Trimmer small

iCuzzini

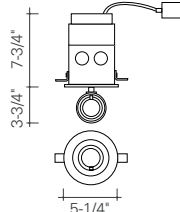

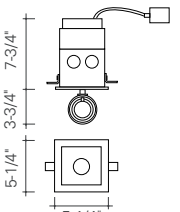

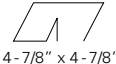

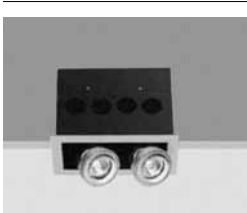

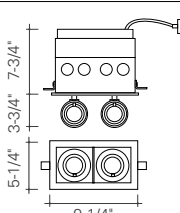

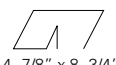

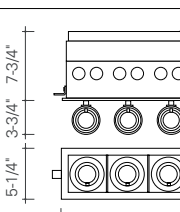

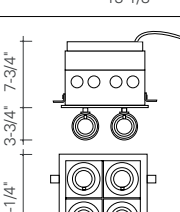

10

This new series of multi lamp downlights supports up to four independently directional lamps, with optical assemblies that are adjustable in virtually all directions.

Designed for use in commercial spaces, like shops, restaurants and displays, the Trimmer downlights are suitable in all projects where directional lighting is desired.

The fixtures are installed easily, and relamping does not require tools.
